

Insurance Management Project

This web -application is developed to manage Insurance-related activity on a single platform. The admin is the user who can check the list of the insurance holder, can add a category, subcategory, add a policy, etc. Another role here is that of the user who will be a customer who can view the category, subcategory, policy and can apply for a policy listed therein.

Today, as we are living in uncertainty, what may happen tomorrow no one knows, whether it is related to our health or the objects around us that we use in our daily life. So, why not take Insurance. Insurance is all about providing financial safety to the individual. It helps us to enjoy financial security. If we have a proper application to access all the Insurance related activity then it will be cherry on top.

So, Insurance Management System project has majorly two roles: One is the admin and another one is the customer. Admin who is the main user of this application will add the policy; add the category of Insurance along with the subcategory. Another role is that of customers who will buy the policy from this platform and can view the list of policies he/she holds.

The following are the major objective of this application:

- 1. To provide a bug-free application to the policymaker(admin) as well as the customer.**
- 2. The main objective is to build a secured, robust Insurance Management system where the policies are managed properly.**
- 3. It maintains the record of customers, policies, buyers' policies efficiently so that it would be easy to access at any time 24*7.**

Modules and Functionalities of an Insurance Management System

There are two main users of this application. One is the Admin whose responsibility is to manage categories and policies and another role is that of the customer who will buy the policy.

Admin

- Admin can VIEW the User list.
- Admin can ADD/VIEW/UPDATE/DELETE Category.
- Admin can ADD/VIEW/UPDATE/DELETE Sub-Category.
- Admin can ADD/VIEW/UPDATE/DELETE Policy.
- Admin can VIEW/ACTIVATE/CANCEL the buyers' policy request.

Customer

- Customers can VIEW the list of Categories.
- Customers can VIEW the list of Sub-Categories.
- Customers can Apply for a Policy.
- Customer can VIEW the list of Policy he/she holds.

NOTE: The profile section, log-in, and registration features are common to all users in the system.
